Fully Vaccinated Adults 65 and Older Are 94% Less Likely to Be Hospitalized with COVID-19

CDC Assessment Finds mRNA COVID-19 Vaccines Reduce COVID-19-Related Hospitalizations Among Older Adults

Both mRNA COVID-19 vaccines (Pfizer-BioNTech and Moderna) authorized and recommended in the United States protect against COVID-19-related hospitalization among adults 65 years and older, according to a new CDC assessment

that finds fully vaccinated adults 65 years and older were 94% less likely to be hospitalized with COVID-19 than people of the same age who were not vaccinated. People 65 and older who were partially vaccinated were 64% less likely to be hospitalized with COVID-19 than people who were not vaccinated. People were considered "partially vaccinated" two weeks after their first dose of mRNA vac-

cine and "fully vaccinated" two weeks after their second dose.

These are the first real-world findings in the United States confirming clinical trial data showing mRNA vaccines prevent severe COVID-19 illness. The findings provide additional support for CDC's recommendation for COVID-19 vaccination among people

"Motorcyclists will be out in force as the weather gets warmer, which is why it is the perfect time for us to remind the community about the vulnerability of motorcycle riders," said Chief Don White. "All motorists need to know how to anticipate and respond to motorcyclists to avoid crashes."

Here are a few safe driving tips to prevent crashing with a motorcycle:

- Though a motorcycle is a small vehicle, its operator still has all the rights of the road as any other motorist. Always allow the motorcycle the full width of a lane.

- Always signal when changing lanes or merging with traffic.

- If you see a motorcycle

with a signal on, be careful. Motorcycle signals are often non-canceling. Always ensure that the motorcycle is turning before proceeding.

- Check all mirrors and blind spots for motorcycles before changing lanes or merging with traffic, especially at intersections.

- Always allow ample follow distance - three to four seconds - when driving behind a motorcycle. This gives riders more time to maneuver or stop in an emergency.

According to preliminary data provided by Tennessee's Integrated Traffic Analysis Network (TITAN), there were 2,670 motorcycle crashes statewide last year. Of those crashes, 151 were fatal. For more information, please visit www.tntrafficsafety.org.

65 and older in the U.S. population under the Emergency Use Authorization (EUA) for the applicable COVID-19 vaccine as the risk for severe illness with COVID-19 increases with age, with older adults at highest risk.

"These findings are encouraging and welcome news for the two-thirds of people aged 65 and up who are already fully vaccinated," said CDC Director Rochelle P. Walensky, MD, MPH. "COVID-19 vaccines are highly effective and these real-world findings confirm the benefits seen in clinical trials, preventing hospitalizations among those most vulnerable. The results are promising for our communities and hospitals. As our vaccination efforts continue to expand, COVID-19 patients will not overwhelm health care systems – leaving hospital staff, beds, and services available for people who need them for other medical conditions."

The assessment looked at hospitalizations in two U.S. hospital networks covering 24 hospitals in 14 states. Vaccine effective-

ness was assessed by comparing the odds of COVID-19 vaccination among hospitalized people who tested positive for the virus that causes COVID-19 (these were case-patients) versus those who tested negative (these were controls). Among 417 participants in the assessment, there were 187 case-patients and 230 controls. Close to half of the patients were more than 75 years old.

Also noteworthy, while early reports from Israel also documented the real-world effectiveness of COVID-19 vaccination, including among older adults, those reports only looked at vaccination with Pfizer-BioNTech vaccine. In this CDC assessment, both Pfizer-BioNTech and Moderna vaccine products were equally represented.

As expected, the assessment confirmed that vaccination provided no protection to people who had received their first dose fewer than two weeks earlier. It takes two weeks for the body to form an immune response after vaccination.

Two networks previously

established to conduct surveillance for serious influenza disease provided the data for this assessment: Hospitalized Adult Influenza Vaccine Effectiveness Network (HAIVEN) and Influenza Vaccine Effectiveness in the Critically Ill (IVY).

This assessment is one of many planned COVID-19 vaccine effectiveness assessments to evaluate the real-world benefits of COVID-19 vaccines. Results from these assessments

will help inform vaccine policy decisions aimed at saving lives and decreasing serious COVID-19 disease as much as possible.

CDC recommends everyone 16 years of age and older in the U.S. population under the EUA get the applicable COVID-19 vaccine as soon as possible.

Horoscopes

home today and put conversations with your friends on hold for a while. You might miss a call from someone far away, but the person will try to reach you later. Relax, make yourself some tea, and enjoy the silence. A little quiet time now and then is good for you.

Gemini 5/21-6/20

A treasured possession might be missing somewhere in the house today, Gemini. No matter where you look, you won't be able to find it. This could stimulate your determination, and you might end up searching for hours. The object is in the house, but it's probably under something, perhaps in a place you would never dream of looking. Check the biggest rooms in the house.

Cancer 6/21-7/22

A romantic partner might suggest a trip together, Cancer, perhaps to a place you've been anxious to see. This is a possibility, but now your friend is merely kicking the idea around. If you like the idea, don't respond too enthusiastically right now or your friend might feel threatened and back off. In fact, don't talk much at all. Listen and nod agreeably!

Leo 7/23-8/22

Uncomfortable intuitive impressions from someone close might be troubling, Leo. Is your friend ill or bothered by events out of his or her control? Your friend probably won't want to talk much about it, so you will just have to let them tell you what's going on when the time is right. This could be frustrating for you, but be patient. That's all you can do now.

Virgo 8/23-9/22

A goal you've been pursuing may be unworkable now, Virgo. You may have to put it on hold for a while. This could be disappointing, but think about it carefully. What other dreams do you have? Figure out which ones are most important to you and then decide which are most promising right now. Sometimes little setbacks like this prove to be blessings in disguise.

Libra 9/23-10/22

Confusion may reign today as you try to glean some information that seems to be totally elusive, Libra. Are you researching a project? Are some of the facts obscure? For now, it might be better to work on something else and go back to your research in a few days. To keep at it now might involve you in a lot of work for negligible results.

Scorpio 10/23-11/21

A sibling or neighbor might be compelled to move away, Scorpio. This might be emotionally wrenching, and you could have a difficult conversation with this person. It isn't always easy to let go of someone you care about, but this could be a valuable lesson in detachment. It will probably take you a while get used to the idea, though you still won't like it. Hang in there!

Sagittarius 11/22-12/21

Money matters might seem disastrous today, Sagittarius. You may have had a temporary setback, but you're probably being especially pessimistic and not seeing the whole picture. Sit down and try to juggle a few figures. You will probably find that you're better off than it seemed at first. Whatever expenses come up, you will be able to handle them. Focus on what needs to be done and do it!

Capricorn 12/22-01/19

A temporary separation from a romantic partner might have you despairing today, Capricorn. Your imagination may conjure up all sorts of dreadful scenarios, like your beloved finding someone else. Don't do this to yourself. Your friend probably misses you, too. Keep busy so the days pass quickly until your friend comes back and you're together again. Be patient!

Aquarius 1/20-2/18

Have you been walking or exercising too much lately, Aquarius? If so, you might experience aching feet and legs today. Wear comfortable shoes and stay off your feet as much as you can in order to allow the pains to heal. You might want to relax in a hot tub at some point, preferably with a romantic partner! This is one way to turn a misfortune into a great time.

Pisces 2/19-3/20

A close friend or romantic partner might be in a negative mood today, Pisces. You may want to try to lift this person out of that mood. Take your friend to a sporting event, party, or funny movie. If you're refused at first, don't take no for an answer! It will do your friend good to get out of that funk, and it will do you good as well!

Aries 3/21-4/19

You might have trouble with your plumbing today, Aries, particularly if you have a big kitchen. This is too complex a problem to handle yourself. Pay the money to have a professional take care of the problem. It will save you work and frustration. In the meantime, have a pizza delivered while you're waiting to get your kitchen back!
