CDC assisting Michigan and Ohio with E. coli O157 outbreak with unknown food source

A CDC investigation notice regarding a multistate outbreak of E. coli O157 infections is now live: <https://www.cdc.gov/ecoli/2022/o157h7-08-22/index.html>

Key points:
29 people infected with the outbreak strain of coli O157 have been reported from 2 states: Michigan (15) and Ohio (14). Nine hospitalizations and no deaths have been reported.

A food has not yet been identified as the source and this investigation is ongoing.

The true number of sick people in this outbreak is likely higher than the number reported by CDC. Michigan and Ohio have both reported large increases in the number of coli infections in their states. Public health officials are working to determine how many of these infections are linked to

the outbreak.

CDC is using the PulseNet system to identify and confirm illnesses that are part of this outbreak. CDC PulseNet manages a national database of DNA fingerprints of bacteria that cause foodborne illnesses. DNA fingerprinting is performed on bacteria using a method called whole genome se-

to provide his identification when asked countless times. Jetton sat down on a bench and was barley able to keep himself from falling over. Deputy could smell a strong odor of an alcoholic beverage emitting from Jetton, his eyes were watery, glassy

and bloodshot. Jetton became uncooperative and would make statements that upset his daughter to the degree she began to cry. Jetton's father arrived about 40 minutes after first confronting him. Jetton's father took custody of his granddaughter. Jetton refused commands to stay seated at the bench and tried

to push past Deputy. Deputy attempted to take Jetton into custody and Jetton began to resist.

After a brief struggle Jet-

Chadwick Jetton, 30, Concord Farms Lane Knoxville, was charged with Public Intoxication, Resisting Arrest, and Criminal Littering.

Deputy Bengel LCSO, along with Cpl. Gray, were working security at the Tiki Hut/Calhoun's in Lenoir City. During the evening Cpl. Gray and Deputy observed the Offender, later identified

as Chadwick Jetton, consuming multiple alcoholic beverages. It was later determined that Jetton was at the Tiki Hut with his young daughter (approximately 3-4 years old). After witnessing Jetton consume multiple alcoholic beverages, he became severely intoxicated. Jetton was seen stumbling around, heard slurring his words, and almost falling several times. Jetton made his way to the

volleyball court next to the restaurant and began to roll around in the sand with his daughter. Countless patrons and employees came to Cpl. Gray and myself to report Jetton being intoxicated and their concerns for him driving away with his young daughter in the vehicle. Jetton began stumbling through the parking lot

and threw his drink towards a parked truck and into the grass. Cpl. Gray and Deputy stopped Jetton, spoke to him about being too intoxicated to drive and suggested him call a ride. Jetton agreed that he shouldn't drive and called for a ride. Jetton became belligerent, stated he was being harassed and refused

Assault

Jason Broyles, 51, D Street Lenoir City, was charged with Assault, and Resisting Arrest.

Officers with the Lenoir City Police Dept. were dispatched to D St for a disturbance related call. A male called 911 and stated that he had a female at his house and that she was "acting stupid" and when asked if it was medical related the male stated to dispatchers that "he wasn't a doctor". Upon arrival Officers spoke with a female/victim who was bleeding from her hand and told officers that her Husband (Jason Broyles) had locked her out of the house during an argument, and when she tried to get back inside knocked to hard on one of the doors glass panes causing it to break and cut her hand. At that time she stated that Jason reached through the opening and grabbed her by the hair and pulled her head to the door. Officers did notice the victims hair to be bunched up in the front as if it had been pulled. Contact was made with Jason who was hostile towards officers, not wanting to cooperate other than stating his wife was stupid and he "didn't put hands on her" He stated that she wanted to go out with a friend, which caused an argument between the two and locked her out of the house when she went outside and that she did break the pane when trying to get back in. Jason appeared to be intoxicated and admitted to officers that he had drank 5 or more beers. Officers determined Jason to be a primary aggressor and was asked to step outside to be placed in custody due to a large dog being in the house and refused to do so. Officers attempted to place Jason in custody and resisted causing officers to sween

kick his legs into a controlled fall onto the ground and officers were able to get cuffs on without further incident. Both children of the couple were present at the time but stated that they did not witness the incident occur between their parents. The victim refused medical treatment and the male was transported by Officer Eldridge to the Loudon Co Jail.

CDC

quencing (WGS).

WGS from the illnesses in PulseNet showed that bacteria from sick people's samples are closely related genetically. This suggests that people in this outbreak got sick from the same food.

Some of the illnesses reported in Michigan and Ohio have not yet been reported to the PulseNet system, but investigators are working quickly to add them to PulseNet to determine if they may be part of this outbreak. The number of illnesses reported by CDC is expected to increase.

State and local public health officials are interviewing people about the foods they ate in the week before they got sick.

If a food item is identified, investigators will issue advice for people and businesses.

What You Should Do:

Call your healthcare provider right away if you have severe coli symptoms.

If you have symptoms of coli, help us solve this outbreak:

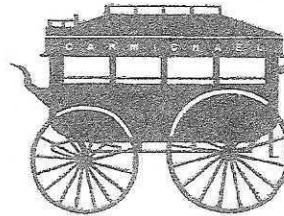

Write down what you ate in the week before you got sick.

Report your illness to your local or state health department.

Answer public health officials' questions about your illness.

Follow these four food safety steps to prevent getting sick from coli: clean, separate, cook, and chill.
